

## 1. Product ID

TQ-LL-BL

## 2. Product Name (Website)

Teqvion LED Bulb (5W–50W) B22 Energy Saving Light Bulb

## 3. Product Name (Internal)

C-C Charger

## 4. Product Category

LED Bulb

## 5. Product Overview

**Teqvion LED Bulbs** are energy-efficient lighting solutions designed to provide bright and uniform illumination for residential and commercial spaces. Available in a wide range of wattages (5W to 50W), these bulbs are ideal replacements for traditional incandescent and CFL bulbs.

Equipped with a standard B22 base, the bulbs are easy to install and compatible with a variety of fixtures. Built using advanced LED technology, they ensure low power consumption, long lifespan, and minimal heat generation. The bulbs deliver consistent brightness with excellent color quality, making them suitable for everyday lighting needs.

## 6. Technical Specifications

Parameter	Value
Input Voltage	100–240V AC
Power Output	5W – 50W
Base Type	B22
Frequency	50-60Hz
Operating Temperature	-10°C to 50°C
Lumens	130 lm/ Watt
Color Temperature	2700K / 4000K / 6500K
Color	Cold White / Warm White
Beam Angle	240°
Lifespan	Up to 15,000–25,000 hours

## 7. Key Features

- Upto 85 % Energy Saving
- B22 cap – direct replacement for incandescent bulbs
- Low and high voltage protection
- Innovative linear driver technology
- Long operational life

- Stable light output
- Low heat generation
- Instant start with no flickering

## **8. Applications**

- Residential lighting (living rooms, bedrooms, kitchens)
- Office and workspace lighting
- Shops and retail stores
- Hotels and hospitality spaces
- Indoor general-purpose lighting
- Decorative and ambient lighting

## **9. Product Variants**

5W – 50W

## **10. Packaging Details**

(To be defined – box type, quantity per carton, etc.)

## **11. Certifications**

(To be defined – BIS / CE / RoHS etc.)
